Shahd Shwekyeyeh	1222105	QA & Software Tester

Group No:1 | Role: Customer Group | Developer Group: 2— Business No. 40

1. Business Overview

The project is a cake shop that has three branches in Ramallah, Nablus, and Hebron, offering different types of cakes and sweets for various occasions such as birthdays, weddings, and graduations. The **system** aims to develop an **online** ordering system with home delivery service to make the ordering process smooth and organized, enabling customers to place their orders easily. It also aims to **increase online** orders, improve the **efficiency** of the ordering process, support **expansion** to new branches, and **maintain** product quality during growth.

2. Business Services

• Cake Selection & Ordering:

Customers select cakes in-store, where available options are presented and they can choose from them. The customer chooses the suitable cake and places the order by providing personal and delivery details, then confirms the order after reviewing the information.

• Custom Cake Orders:

Customers provide their cake requirements such as flavor, size, design, and message. They can also provide an image, sending a picture, or describing it. The shop reviews the requirements and confirms the order before starting preparation.

• Payment:

Customers pay using cash or **available** card payment methods. Delivery is free for orders above a certain amount, depending on the order type.

• Delivery & Pickup:

The shop prepares the cake and allows customers to choose between picking up the order from the store or requesting home delivery at the agreed date and time.

• Order Updates & Customer Support:

Customers can contact the shop by phone or visit in person to ask about their orders. They can also contact the shop for inquiries, suggestions, or complaints.

• Promotions & Discounts:

The shop provides various promotions and discounts on selected cakes, which are communicated through social media and email newsletters.

3. Business Capacity

The Cake Shop operates through three physical branches located in **Ramallah, Nablus, and Hebron**, serving customers across only these cities with home delivery.

The business handles approximately **210 orders per month** across all branches (roughly 53 orders per branch). Demand is highest during holidays, graduation seasons, and wedding periods. On average, 70% of orders are placed online. The business serves a diverse customer base, with no more than **12 concurrent active orders** being processed at any given time.

Product Catalogue: The shop offers **3 main cake categories**, broken down as follows:

- **Occasion Cakes** (weddings, birthdays, graduations, engagements): 8 size variants, 5 flavour options (vanilla, chocolate, red velvet, lemon, caramel)
- **Daily/Display Cakes** (cheesecake, chocolate cake, vanilla cake): 12 standard products available daily in each branch
- **Custom-Order Cakes:** fully personalized cakes based on customer requirements

In total, the shop maintains **35 distinct products**.

Branch Breakdown:

- Ramallah: 8 staff, 85 orders/month, up to 4 concurrent orders
- Nablus: 6 staff, 75 orders/month, up to 4 concurrent orders
- Hebron: 6 staff, 50 orders/month, up to 3 concurrent orders
- **Central Staff:** 2 staff, no direct order

4. Employees & Roles

Please note that the number of employees per role is shown in brackets.

Good: Describe the services you provide and details of each including products you sell ?

Good description of existing business services describe existing provided business services; be specific and direct and describe each service

not clear how provided?

Be specific on what exactly business services it offers, and their specific details, describe how each works, not how you would like it to work! Example services?, e.g., searching products, payment, guarantee, order tracking, selling products, wish list, points collection etc.

Good description of Business Employee? you need include employees Roles and numbers

Reasonable statistics: serve: visit or buy, orders etc. be specific for each service business services are poorly/confusingly stated

Number of customers: concurrent numbers? will be at the same time. be specific and detailed in your statistics

Good business details and demands: how many customers the business usually serves, how many employees does it employ, how many orders on average per week/month etc.

Avoid estimates, be specific in your statistics (exact no of products, categories of products etc), avoid large ranges; number of employees and their roles

Two central roles operate across all branches from the Ramallah headquarters:

- **Orders Coordinator (1)** – Monitors incoming orders, coordinates between branches, and handles customer inquiries.
- **Promotions & Discounts Coordinator (1)** – Manages seasonal offers and discounts across all branches.

Each branch employs staff based on its size and order volume. The standard full branch (Ramallah) has up to **8 employees**, divided as follows:

- **Branch Manager (1)** – Oversees daily operations, staff scheduling, and inventory management.
- **Pastry Chefs (2)** – Responsible for cake production and quality control.
- **Decorator (1)** – Handles custom cake decoration and finishing touches.
- **Cashier/Customer Service Representative (1)** – Manages in-store orders and handles customer inquiries.
- **Delivery Driver (2)** – Handles home delivery within the branch's service area.

Good description of Business Employee? you need include employees Roles and numbers

For branches with 6 staff (Nablus & Hebron), the division becomes: 1 Branch Manager, 2 Pastry Chefs, 1 Decorator, 1 Cashier/Customer Service Representative, and 1 Delivery Driver.

The total workforce across all branches and central operations is **22 employees** (20 branch staff + 2 central staff).

5. Business Process / Business Model

Business Process:

Service 1: Standard Cake Order

- Customer contacts the shop via phone or WhatsApp and asks about available options (on)
- Staff describes available options; customer specifies their choice
- Staff confirms the order verbally and records it manually
- Customer pays cash upon delivery or at the store; no formal receipt is provided (delivers)

Service 2: Custom Cake Order

- Customer contacts the shop to describe the custom cake, may include a photo
- Staff discusses details with the customer and agrees on a price
- Customer pays a 50% cash deposit in person at the branch to confirm the order
- Cake prepared → staff notifies customer via WhatsApp when ready for delivery (ing 50%)

Good but you should describe an existing business processes as described above.
Describe business processes for each business service, Not users?? -and there should be a business process for each service

Service 3: Delivery & Pickup

- Delivery: customer provides address during the order call; driver delivers at the agreed time and calls the customer upon arrival
- Store pickup: customer visits the branch at the agreed time to collect and pay for the order

Service 4: Ratings & Feedback

- Feedback is collected informally — customers may call or message the shop to express satisfaction or complaints
- No formal feedback system exists; staff relay complaints to the manager verbally

Service 5: Promotions & Loyalty

- The shop offers seasonal discounts (Eid, Mother's Day, Valentine's Day) communicated via WhatsApp status or in-store signage
- No formal loyalty programme exists; regular customers may receive informal discounts at staff discretion

Business Model:

Main Income:

Selling standard cakes from the catalogue.

Secondary Income:

Custom design fees (depending on complexity and size)

Delivery fees (based on city)

Seasonal premium pricing (Eid, Mother's Day, Valentine's Day, etc.)

6. Challenges & Potential Problems

- **Order management via phone/WhatsApp:** Orders may be missed or confused because they are received manually without a central system.
- **Order mix-ups between staff:** Employee mistakes can happen when relaying customer details and order information manually.
- **Maintaining product quality:** Cakes may lose quality or get damaged due to long delivery times.
- **Workload pressure:** High demand times can cause delays and poor organization.
- **Cash on delivery risks:** Some customers may cancel or refuse orders when receiving the cake.
- **Communication gaps:** Taking orders manually can lead to misunderstanding for custom cakes.

Reasonable- you should describe business challenges or problems,...faced by your business
